by COSENTINO

## SILESTONE

Silestone was invented in 1990. It is a product that brings together the best of natural stone and manages to improve it even further. Silestone has made an undeniable leap forward that gained the immediate recognition of professionals and end users. It has been so successful that the antibacterial, quartz worktop has become a unique category within the brand.

Silestone® by Cosentino is a unique brand; for its properties and characteristics, and because anything bearing the name Silestone® automatically becomes something unique. Its exclusive nature means that it is a brand associated all around the world with design and fashion, achieving the highest levels in innovative and contemporary design.

Based on certain, strict measures, certified by industry professionals, Silestone® has achieved a position of global prestige. The brand is present in more than 50 countries, is market leader in its sector and an example of research and innovation for private and public constructors in the 21st century.
